Outdoor Living Made Easy

CASUAL FURNITURE

VOLUME 21

2024-2025

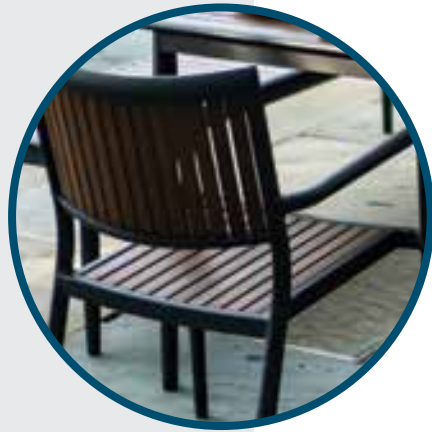

SUPERIOR Service

EXCEPTIONAL Value

HIGH Quality

STYLISH

Alfresco Home designs, develops, and distributes outdoor lifestyle products for the casual furniture and garden industries.

We provide stylish, comfortable, and high quality products at an exceptional value to ensure the enthusiasm and profitability of our customers.

We pride ourselves on the experience of our team, the creativity of our process and the superior service we deliver.

We operate from a long-standing tradition of family and community, and treat every customer, colleague and business partner as part of that collective family.

Alfresco Home honors the sanctity of the family table, the beauty of the garden, and the joy that outdoor living brings families around the world.

Updated Website with New Dealer Online Ordering

Prior to gaining full access to the enhanced dealer portal, each retailer must apply for access as follows:

1. Go to www.alfrescohome.com – select **Dealer Log In** (in the upper right corner of the page).

2. Select **Apply for Access**, enter your email address and select Request Account.

3. You will receive an email from **"Alfresco Home Online"** with a link to the Account Request Form.

Note: Your Customer Number is required to complete the form and is noted on all Alfresco Home Invoices. When done, please select request account.

4. Alfresco Home will review the request for access and upon approval send you an email with a link for you to **create your user name and password**.

Updated Website with Significant Dealer Enhancements.

- 24-Hour Online Ordering Portal**
- Available inventory refreshed hourly
- Accessible image library for all of your marketing needs**
- Multiple product search layers
- Library of retailer tools, including product care guides**
- Enhanced dealer locator for your customers
- Alfresco Home Trade Show Schedule**

And MUCH, MUCH MORE!

BICULAIR® EVERWOVEN™

Apple Bee furniture collection by Alfresco Home is entirely handmade. The frame is manufactured from aluminum, with no concessions made in wall thickness or finish. The welds are of first-rate quality, the screws are of high-grade steel, and the frame is anodized in a matte or high-gloss finish, or treated with color epoxy. A unique feature of the range is that the frames are interwoven with special Biculair® Everwoven™. Biculair Everwoven was originally developed for professional use. This highly durable imitation rattan fiber (HDPE) is fully weather-resistant, colorfast, recyclable and environmentally friendly. This means that the appearance and performance of the furniture is not affected by weather conditions and that the colors retain their natural quality, even better than real rattan! The top-class quality of Everwoven™, tested by the Netherlands Organisation for Applied Scientific Research (TNO), stands out against that of other somewhat comparable wickerwork.

LIGHTWEIGHT CONCRETE (LWC)

Lightweight concrete has a core of fiber reinforced cement board. Throughout the world, this is also used for facade panels to decorate exterior walls because of its many advantages. It's very strong, durable, stable and it can withstand the elements water and fire. We have chosen the same material for our lightweight concrete tops, making these tops solid, stable and—unlike other resin materials—our Lightweight Concrete tops perform very well under all kinds of weather conditions. The combination of a beautiful design and this quality material ensures that our Lightweight Concrete tables provide many years of enjoyment.

40 & 340 SERIES CUSHIONS

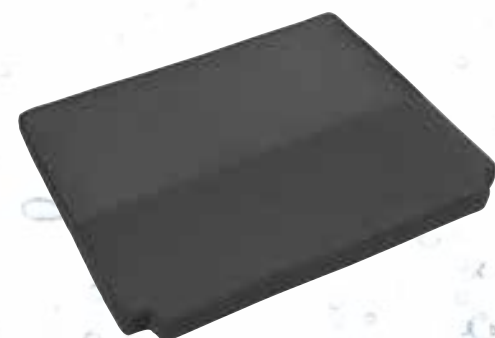

BEE WETT® CUSHIONS

PREMIUM TECHNOLOGY

Apple Bee furniture collection by Alfresco Home is made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique BEE WETT filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your BEE WETT cushion dries incredibly quick compared to other cushions. The BEE WETT cushion is upholstered with an Olefin material that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The BEE WETT-line features premium technology on the cushions, which ensures that the cushions dry quickly after heavy rain.

The open fabric structure on the bottom of the cushion drains all moisture perfectly

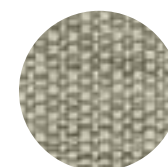

Care

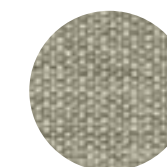

For many years, we have been supplying Apple Bee furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibers and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a cool water delicate fabrics setting. Always rinse out the covers thoroughly! In order to retain the cushions' water-repellent layer you can add a little ScotchGard or similar to the last rinsing.

Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibers will pull the cover nice and tight around the filling as it dries.

ALFRESCO HOME

316 SERIES EVERTEAK COLLECTION

This groundbreaking and unique engineered polymer material features an extremely realistic wood-like appearance and texture with minimal if any maintenance typically required for a real wood product.

The San Simeon Collection will be stocked in the Mineral Finish with Sunbelievable Khaki Fabric.

The Alpaca Finish shown in photographs is available on Direct Container Only.
(Once domestic stock is released)

Shown: San Simeon Deep Seating in Alpaca Finish

ALFRESCO HOME

316 EVERTEAK COLLECTION

EverTeak™

FEATURES

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

Mineral Finish

Mineral Finish on all frames is stocked domestically in USA

ALFRESCO HOME

316 EVERTEAK COLLECTION

EverTeak™

BENEFITS

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance over time
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

Alpaca Finish

Alpaca Finish available on Direct Container.
Limited warehouse availability for 2024-2025 season. Please check with your sales rep or log onto AH Dealer Toll site for details.

Recessed Sintered
Stone Top

Integrated Storage

Serving Height Shelf

Umbrella Hole

These 9mm thick durable outdoor tops are a combination of sintered stone imported from Spain and tempered glass that is mounted on an aluminum frame. This unique combination of materials offers both unmatched durability and beauty. The top surface is created using a process called sintering which uses intense heat and pressure to mimic the Earth's own natural process of creating granite.

Features and Maintenance EverTeak™

ALFRESCO HOME
Outdoor Living Made Easy

EverTeak™ (316 Series) is made of a proprietary blend of Polystyrene (PS) and is engineered using a polymer composed of unique virgin plastics. It contains no cellulose-based fibers, which makes it a perfect material for outdoor furniture. This product is constructed using stainless steel hardware.

EverTeak™ Beauty

EverTeak™ has the appearance and touch of natural teak. Each piece is also simulated with natural wood grain details, both on the surface and within cross sections.

The EverTeak™ manufacturing process is carefully executed to produce a slight and unique variation in color for each piece, further resembling natural wood. Additionally, the depth of the color also varies depending on lighting spectrums and viewing angles.

EverTeak™ Features

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

EverTeak™ Benefits

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance overtime
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

EverTeak™ Ease and Care

EverTeak™ requires no painting, staining, or waterproofing. Consumer may choose to apply a commercially available outdoor synthetic wood protectant for maximum protection.

EverTeak™ surface is resistant to alcohol, juice, and coffee spills under normal use and does not stain from common household liquids. Cleaning is simple – a mild soapy solution with a soft cloth is usually sufficient to remove dirt and debris.

Oil stains (plant and animal-based oil) on the surface can be removed by using a soft-bristled brush to clean with baking soda or non-abrasive cleaners.

While typically resistant to household liquids and stains, it is important to clean your EverTeak™ furniture regularly and not allow residue to build up on the surface that will make cleaning more difficult.

Everyday scratches and scuffs are normal and can be repaired using a scouring pad to sand lightly with the grain. Deeper gouges require the use of wood putty to repair.

Care should be taken not to place hot objects like pots, pans or grill tools on EverTeak™ as they will scorch the surface.

Avoid buildup of grease and stains by cleaning immediately after their occurrence by washing with a nonabrasive sponge, soft-bristle brush, or microfiber towel with a cleaning solution of 1/2 cup (2 oz.) mild biodegradable liquid soap in a gallon of lukewarm water. Rinse thoroughly with clean water and allow to air dry. For heavily soiled or stained areas, liberally apply cleaning solution (Simply Green, Goo-Gone Patio Furniture Cleaner or other non-abrasive multi-purpose cleaner) directly to heavily soiled areas. Using a heavy-duty scouring pad, wipe the entire furniture surface. Wipe off with a clean microfiber towel and rinse thoroughly with clean water and allow to air dry. Repeat as necessary for a complete, even surface appearance.

To maintain the natural wood look and make ongoing maintenance easier over time, we recommend the use of a commercially available marine surface or synthetic wood protectant and/or cleaner before placing into service for the first time and each season after cleaning and before putting into service. These protectants are designed to repel stains, maintain color, and provided added protection against UV exposure. Products specifically formulated for this application are available from most outdoor furniture and hardware stores, home improvement warehouses and general e-commerce retailers. Two protectants that have been used with success are 303 Marine Aerospace Protectant and Meguiar's Extreme Marine Vinyl and Rubber Protectant.

EverTeak™ Durability and Testing

All EverTeak™ materials have been specifically designed and rigorously tested for outdoor environments. Given normal use, we are pleased to provide 3-year limited residential warranty on the synthetic wood against defects in materials and workmanship that impair the use of the product.

Range of Temperature: From -10° to 158° Fahrenheit (Results from compressive and flexural strength testing with SGS approval)

UV Inhibition: Four years of exposure to sunlight (Xenon arc 300 W UV simulator for 448 Hours)

A photograph of an outdoor patio furniture set. The set includes a three-seater sofa, a single armchair, and a coffee table, all made of dark brown wicker with light beige cushions. The furniture is arranged on a grey stone deck with a patterned rug. A small side table with a vase of flowers and a coffee table with a bottle of yellow liquid and a container of snacks are also visible. The background shows a house with white siding and a glass door.

A photograph of an outdoor patio furniture set in a rustic setting. The furniture includes a large sectional sofa with light-colored cushions and several throw pillows, a matching loveseat, and a coffee table. In the background, there is a wooden fence, a wooden building with a window, and a large tree. The scene is lit with warm, golden light, suggesting late afternoon or early morning.

EVERGLOW™ COLLECTION

Features and Benefits

(applicable to various models)

- Made in Europe
 - Outdoor and Indoor Use
 - Solar and Rechargeable Batteries
 - Advanced Technological Integration – USB charging allows for various charging sources.
 - Advance tech memory setting
 - Longer Battery and Run Life
 - Dimmable & LED Lighting
 - Magnetic Surfaces
 - Exceptional Luminosity
 - 110 to 900 Lumens
 - Quality of the Components
 - Solar Smart Tech Remote Control
 - Rechargeable Bulbs
-
- Inspired Design
 - No Cables, No Outlets
 - White, Warm and RGB Multi Color Light
 - Plug, Play, Portable – easy to use
 - Seagrass, Rattan, Bamboo
 - Rotationally Molded Polyethylene
 - Music on Specified Models
 - Convenience and Versatile
 - Energy Efficient and Sustainable
 - Enhanced Ambiance and Aesthetics
 - Cost-Effective – portable lighting requires no professional wiring installation
 - Low Maintenance

Use according to IP.

Here you can find information about the possible uses of Newgarden's products according to their IP (index of protection of the electrical or electronic system against external agents)

IP20

Newgarden's products with IP20 can only be used indoors, the electrical system, switches or cables must be protected from direct contact with water. Note that, although the product is made of Polyethylene, which is resistant to external agents, the electrical system is designed for **indoor use only**.

IP43

Newgarden's products with IP 43 / 44 can be used outdoors, it is protected against dust and weak and very moderate rain. **If this product also have accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity.** Store it in a dry place after use. In the event of rain or very adverse weather conditions, it should be protected from these external agents to avoid future problems.

IP44

Newgarden's products with IP 54 **can be used outdoors, as they are protected against dust and light rain.** If this product also has accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity. Store it in a dry place after use. In case of rain or very adverse weather conditions it must be protected from these external agents to avoid future problems.

IP54

Newgarden's products with IP 65 **can be used outdoors, they are airtight against dust and rain. If this product also has accessories made of natural fibres, wood or metal parts, it is advisable to protect it from direct contact with water and humidity.** Store it in a dry place after use. In case of rain or very adverse weather conditions it must be protected from these external agents to avoid future problems.

IP65

Newgarden products with IP67 are dust-tight and rainproof. They are also floating (submersion is not recommended) so they can be used in swimming pools. They must be protected against very adverse weather conditions.

IP67

Newgarden products with IP68 are dust-tight and rainproof. They are also floating and submersible (according to each product's own instructions for use) so they can be used in swimming pools. They must be protected against very adverse weather conditions.

IP68

Alfresco Home offers stunning cushion options that are designed for outdoor living.

Quick Ship Cushions:

Many of our top-selling dining and deep seating casual furniture collections are available through our Quick-Ship program. Classic fabrics and fast delivery make these beautiful cushions a successful solution for your business!

Factory Supplied Cushions:

Most of our casual furniture collections come with factory supplied cushions that offer outdoor quality solutions at an excellent value. To ensure high levels of colorfastness, our factory supplied cushions are covered in 100% solution-dyed fabrics. UV stabilizers in their fabrics enable these cushions to withstand prolonged exposure to sunlight, rain, and other outdoor elements. Fresh, clean, quick-drying cushions that are stain resistant and 100% recyclable.

Domestic Custom Cushions:

Our exceedingly comfortable custom cushions are made of high-density foam wrapped in Dacron and then finished with 100% solution-dyed Acrylic fabrics from Sunbelievable™ or Sunbrella®. They are a beautiful addition available on most of our casual furniture frames.

All Alfresco Home custom cushions are designed to complement our frames with the correct choice of knife edge or box-edge construction and the proper buttoning solution. Each style has been selected with that collection's comfort, design, and durability in mind.

Alfresco Home. Outdoor Living Made Easy.

Alfresco Home offers premium technology cushions on the 40 and 340 series collections using the BEE WETT® cushion construction.

BEE WETT® Cushion Construction:

The 40 and 340 Series furniture collections by Alfresco Home are made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside. The removable covers are washable, waterproof, and UV-resistant.

Unlike normal foam, the unique BEE WETT® filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture efficiently. This ensures that your BEE WETT® cushion dries rapidly. The BEE WETT® cushion is upholstered with a 100% solution-dyed Olefin material that is not only resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The BEE WETT-line features premium technology on the cushions, which ensures that the cushions dry quickly after heavy rain.

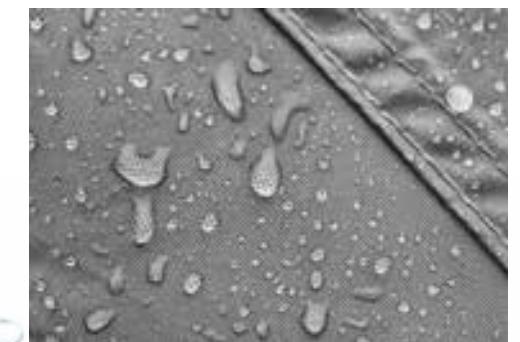

BEE WETT® Cushion Care:

For many years, we have been supplying furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibers and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a cool water delicate fabrics setting. Always rinse out the covers thoroughly. In order to retain the cushions' water-repellent layer you can add a little ScotchGard or similar to the last rinsing.

Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibers will pull the cover nice and tight around the filling as it dries.

The open fabric structure on the bottom of the cushion drains all moisture perfectly

sunbelievable

sunbrella

On the following pages, please browse our standard fabric selections.

Sunbelievable™ fabrics are manufactured by Z-Wovens, considered among the most capable and responsive suppliers of upholstery fabrics in the world. An expert manufacturing team and a dependable supply chain management team promise a level of service and commitment to their customers that is unparalleled.

Z-Wovens manufactures unique aesthetic and performance features into the very heart of these woven fabrics—literally from the fiber up. **All Sunbelievable Fabrics are 100% solution-dyed Acrylic to resist fading and are designed to be luxuriously soft, yet amazingly durable, stain resistant, and cleanable** — even with bleach. Perfect for decks, patios, poolside or in the garden.

- Z-Wovens Fabrics has been a major supplier of performance fabrics to the indoor furniture industry for many years
- Created and designed in North Carolina
- Z-Wovens added their Sunbelievable brand in 2017 with the launch of a Solution Dyed Acrylic and Polyester Blend with great styling, colorations and durability
- Given the success of the outdoor fabric launch, Sunbelievable subsequently added the 100% Solution Dyed Acrylic collection of fabrics including the Lifeguard and Hang Ten series.
- Sunbelievable Lifeguard and Hang Ten fabrics come with a **5 year performance warranty**
- The Lifeguard Patterns on San Simeon are the latest generation
- Alfresco Home's San Simeon EverTeak™ collection uses the Sunbelievable Lifeguard fabric

Performance + Beauty

All Sunbelievable™ Fabrics meet the highest performance standards of any outdoor fabric. Solution-dyed acrylic fibers and an exceptionally fine solution-dyed polyester warp enable our designers to produce a luxuriously soft, more intricately patterned fabric that is also amazingly durable, stain resistant, fade resistant, and cleanable — even with bleach. However, performance alone does not sell the product. We believe that color, beautiful designs and luxurious textures do. Each distinctive fabric we create easily correlates with the entire collection, but can also brilliantly stand on its own. Your retail customers will appreciate how easily our collections coordinate.

Important! Test a small hidden section of the upholstery to ensure fabric and color are not affected. For severe stains, consult a professional upholstery cleaner.

Upholstery Care

Regular vacuuming of your upholstered furniture will enhance the beauty and longevity of your fabric. Treat spills promptly. Gently Blot away the spill with a clean, dry absorbent cloth. Do not rub. Attempt removal of dried contaminants with a soft brush or dull knife prior to using a wet treatment.

While all stains may not be completely removed, these guidelines are suggested for best results.

METHOD A

Use a water-based soap solution of 1 tablespoon laundry detergent per 2 cups warm water. Dampen the cleaning cloth and Gently Blot away the spill. Do not rub. Rotate the cleaning cloth often and rinse with water to ensure complete removal of all soap residue.

METHOD B

Use a mild solvent-based residential upholstery cleaner and follow the manufacturer's instructions.

Cast and Extruded Aluminum

22, 55 and 310 Series

The Alfresco Home cast and extruded aluminum collections offer several frame-finish options. We stock the large majority of product in the frame finish shown in our catalog. Casting benefits include strong, durable, clean and quality finished goods.

These products offer the following features:

- Highly durable, multi-step powder-coated finishes
- Surfaces inspected, pre-treated, and washed in a cleansing solution
- Hand-applied topcoat finishes are bonded, clear-coated and UV stabilized
- Stainless steel/galvanized hardware where applicable
- Adjustable feet levelers

To protect Alfresco Home aluminum furniture:

- Frame cleaning with mild soap only. In no way use harsh chemicals or abrasives to clean furniture.
- Annually clean product. Thoroughly remove dirt, grime, debris, and water.
- All frames and product exposed to chlorine, salt water, and or other chemicals need to be hosed off immediately.
- If mold or mildew should build up (which occurs on all outdoor products from surrounding elements of outdoor maintenance) it is recommended to use a mix of a 1/4 cup of bleach to 3 gallons of water and a soft non-abrasive sponge to best clean your furniture.
- Clean and dry thoroughly prior to storing over winter.
- Always drain any water that may have accumulated over winter or during cleaning.
- Protect finishes with commercially available covers when not in use. Covers are strongly recommended in extremely high heat and sun, as well as snow and cold conditions.

Everwoven™ All Weather Wicker and Aluminum frame

40, 46 and 353 Series

These products offer the following features:

- High density polypropylene wicker extrusions are hand-wrapped on powder coated aluminum frames
- Use of core and flat resin wicker extrusions
- Resin wicker is hand-woven wrapped over powder coated aluminum frames
- Fully welded aluminum frames for superior frame strength
- PE synthetic wicker with UV stabilizers on an aluminum frame

To protect Alfresco Home furniture with Everwoven™ All Weather Wicker:

- Use a damp cloth with mild soap and water to clean dust and stains from the all-weather wicker furniture. Do not use chemicals, bleach, or abrasive cleansers in cleaning any part of furniture.

- Frames exposed to chlorine and salt water or any other chemicals must be hosed off immediately after use.
- Table glass is tempered and can be cleaned with standard glass cleaner. Do not use HOT water on glass.
- Clean and dry thoroughly before storing over winter. Always drain any water that may have accumulated during cleaning or over winter.

Everwoven™ All Weather Wicker, Teak and Eucalyptus Wood

40, 46 and 340 Series

High density polypropylene wicker extrusions are hand-wrapped on aluminum frames and combined with FSC® certified eucalyptus wood components (legs, arms, arm rests). This FSC® wood is harvested in an eco-friendly manner, responsibly grown, gathered, and replenished to prevent deforestation. Eucalyptus wood is organic and its naturally high oil count makes the wood, and subsequently the furniture, resistant to decay, insect infestation, and significant discoloration.

- FSC® Eucalyptus wood surface will organically evolve, expand and contract, change color and texture, and will vary as it ages.
- Checks and small hairline cracks and color changes are normal occurrence as the wood expands and contracts. This is not a defect but an indicator that it is time to oil your product.
- The finishes on our eucalyptus tables yield a stain-free and waterproof surface for approximately 12 months subject to use and climatic conditions.
- Each table and chair is hand-finished; no two pieces will be alike. Additionally, each piece of wood absorbs the hand-applied patina differently, so variations on any table top or chair part are to be expected.
- Over time, Eucalyptus wood products develop a natural grey patina. This is normal and should be expected. The Alfresco Home FSC® Eucalyptus products have a hand-stained finish that simulates a natural, weathered-wood look.

FSC® certified Eucalyptus 46 Series

- Upon purchase, we recommend using a hardwood cleaner and clear timber oil with UV protection to help protect your wood products from the natural aging process.
- Before oiling, check for any residue build-up, if this occurs a light sanding is recommended.
- Manufacturers recommend that you oil your furniture in the shade or under cover. Also, oil and seal the product completely on top and underneath with a clear timber oil. After oiling, wipe off excess oil and allow oil to dry in the shade away from direct sunlight, then wipe off with clear rag to remove any excess oil. This process should be repeated every 3-6 months for best product lifespan.
- The frequency of oiling will vary according to climate conditions in your area and direct exposure to the elements.
- Without protection and regular maintenance the products may develop cracks, checks (small surface cracks), and splinters as well as color fading.

- We recommend using a clear timber oil to help maintain the wood surfaces. Always test a small area and follow instruction when applying oil to surface. We recommend Golden Care Hardwood Protectors available online or at your local home center.
- Checks and small hairline cracks are normal occurrence as the wood expands and contracts. This is not a defect but an indicator that it is time to oil your product.
- Should your wood product develop some cracks or splinters over time, sand the area very lightly.
- Covers are strongly recommended in extremely high heat, sun or pollution areas. We recommend that product be stored with undercover protection during winter months.
- Soapy water and a soft sponge or non-abrasive cloths can be used to lightly clean product frames from normal dirt, grime, and dust buildup. Do not use chemicals, bleach, or abrasive cleansers in cleaning any parts of your furniture.
- After exposing any wood collection to the elements, it is best to tighten any loose fittings and joints. It is recommended to do so every 3-6 months.

Polywood composite table tops

300 and 353 Series

- Color of these 100% polystyrene tables runs throughout the entire density of the piece.
- We recommend the use of coasters and/or placemats with all glass products (such as glass, cups, plates, bowls, vases, etc.) as sunlight shining through the glass can “burn” the composite and cause discoloration. Be careful not to drag glass or ceramic ware across surface so as to avoid scratching the table top.
- Soapy water and a soft sponge or non-abrasive cloths can be used to lightly clean product frames from normal dirt, grime, and dust buildup. Do not use chemicals, bleach, or abrasive cleansers in cleaning any parts of your furniture.

Premium Everwoven All Weather Wicker w/ Aluminum and FSC Teak Components 40 Series

Biculair Wickerwork 40 and 340 Series

- All 40 and 340 series collection items are entirely hand-made.
- Frames are manufactured in aluminum with no concessions to wall thickness and finish ensuring long durability.
- All hardware is made of high quality stainless steel and frames are anodized in a matte or high gloss finish and further treated with epoxy for ultimate beauty and lasting durability
- Unique to these collection, all frames are woven with proprietary Biculair Everwoven which was originally developed for the contract outdoor market.
- The highly durable imitation rattan fibers are made of High Density Polyethylene (HDPE) and are fully weather-resistant, colorfast, recyclable and environmentally friendly.
- The color of these HPPE fibers retains their natural quality and color. This top class quality of the wicker work has

been tested and supported by various Applied Scientific Research organizations and stands out in its class.

Cushions 40 and 340 Series

- Featuring BEE WETT Cushion premium technology constructed to be extremely weather-resistant. Made with a removable cover in top quality outdoor washable fabrics are waterproof, UV-resistant.
- Utilizing the unique BEE WETT construction, the cushion does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that the BEE WETT cushion dries quickly.
- In order to maintain a BEE WETT cushion and fabric cover correctly. Simply brush off dirt with a soft non-abrasive brush or cloth and immediately remove any spilled liquids or other substances.
- Fabric covers can soak in a soap and water solution and can be washed in a cold water delicate fabric environment. Upon removing the cover from the washing cycle, re place the wet cover around the cushion filling so that the natural elasticity of the fibers will put the cover nicely around the filling as it dries.
- Always rinse out covers thoroughly and if you choose, apply a Scotch Guard outdoor resistant layer.

FSC® certified Teak

314 Series

Our FSC® certified grade A/B Teak collection products are fine sanded to a natural patina. Teak Wood will organically evolve, expand and contract, change color and texture, and will vary as it ages. Small hairline surface cracks and checks are normal in any wood products and are not considered a defect.

40 Series LWC Lightweight Concrete Table tops

- Lightweight Concrete is very sensitive to chemicals, so absolutely do not use abrasives, bleach or harsh detergents. Use cleaning products that do not contain acids, such as a lemon-scented cleaning product. These cleaning agents can cause spots and discolorations. We always recommend cleaning the material with a damp cloth and lukewarm water.
- It is best to protect the tabletop from date of purchase with a poly/spraystone protector.
- In addition, the more careful the product is treated, the longer the product stays in good condition. A concrete look piece furniture is sensitive to falling objects. So, for example, never throw keys on a concrete-look piece of furniture. This creates unnecessary pits and scratches. You can solve this in the first instance by filling the holes with transparent nail polish, but carefully, because this can also cause discoloration. Prevention is best. Make sure you use coasters and don't throw objects on the concrete look furniture. Also be careful with other products with acids, such as wine and fat. When this falls on a concrete look furniture, you quickly have stains. In all cases, wipe this off immediately. Regular protection of the top will temporarily delay the absorption of stains.

Features and Maintenance EverTeak™

ALFRESCO HOME
Outdoor Living Made Easy

EverTeak™ (316 Series) is made of a proprietary blend of Polystyrene (PS) and is engineered using a polymer composed of unique virgin plastics. It contains no cellulose-based fibers, which makes it a perfect material for outdoor furniture. This product is constructed using stainless steel hardware.

EverTeak™ Beauty

EverTeak™ has the appearance and touch of natural teak. Each piece is also simulated with natural wood grain details, both on the surface and within cross sections.

The EverTeak™ manufacturing process is carefully executed to produce a slight and unique variation in color for each piece, further resembling natural wood. Additionally, the depth of the color also varies depending on lighting spectrums and viewing angles.

EverTeak™ Features

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

EverTeak™ Benefits

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance overtime
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

EverTeak™ Ease and Care

EverTeak™ requires no painting, staining, or waterproofing. Consumer may choose to apply a commercially available outdoor synthetic wood protectant for maximum protection.

EverTeak™ surface is resistant to alcohol, juice, and coffee spills under normal use and does not stain from common household liquids. Cleaning is simple – a mild soapy solution with a soft cloth is usually sufficient to remove dirt and debris.

Oil stains (plant and animal-based oil) on the surface can be removed by using a soft-bristled brush to clean with baking soda or non-abrasive cleaners.

While typically resistant to household liquids and stains, it is important to clean your EverTeak™ furniture regularly and not allow residue to build up on the surface that will make cleaning more difficult.

Everyday scratches and scuffs are normal and can be repaired using a scouring pad to sand lightly with the grain. Deeper gouges require the use of wood putty to repair.

Care should be taken not to place hot objects like pots, pans or grill tools on EverTeak™ as they will scorch the surface.

Avoid buildup of grease and stains by cleaning immediately after their occurrence by washing with a nonabrasive sponge, soft-bristle brush, or microfiber towel with a cleaning solution of 1/2 cup (2 oz.) mild biodegradable liquid soap in a gallon of lukewarm water. Rinse thoroughly with clean water and allow to air dry. For heavily soiled or stained areas, liberally apply cleaning solution (Simply Green, Goo-Gone Patio Furniture Cleaner or other non-abrasive multi-purpose cleaner) directly to heavily soiled areas. Using a heavy-duty scouring pad, wipe the entire furniture surface. Wipe off with a clean microfiber towel and rinse thoroughly with clean water and allow to air dry. Repeat as necessary for a complete, even surface appearance.

To maintain the natural wood look and make ongoing maintenance easier over time, we recommend the use of a commercially available marine surface or synthetic wood protectant and/or cleaner before placing into service for the first time and each season after cleaning and before putting into service. These protectants are designed to repel stains, maintain color, and provided added protection against UV exposure. Products specifically formulated for this application are available from most outdoor furniture and hardware stores, home improvement warehouses and general e-commerce retailers. Two protectants that have been used with success are 303 Marine Aerospace Protectant and Meguiar's Extreme Marine Vinyl and Rubber Protectant.

EverTeak™ Durability and Testing

All EverTeak™ materials have been specifically designed and rigorously tested for outdoor environments. Given normal use, we are pleased to provide 3-year limited residential warranty on the synthetic wood against defects in materials and workmanship that impair the use of the product.

Range of Temperature: From -10° to 158° Fahrenheit (Results from compressive and flexural strength testing with SGS approval)

UV Inhibition: Four years of exposure to sunlight (Xenon arc 300 W UV simulator for 448 Hours)

321 Series – LIMITED Product Warranty

Under normal residential use, 321 series products are warranted for a period of 3 years against defects in manufacturing or materials. Excluded from this warranty are: misuse or abuse, extreme weather conditions, acts of God, and any wear or damage that is consistent with usage in contract, industrial or otherwise non-residential settings.

321 Series - Aluminum Frames And Finish

Most of 321 series products are constructed from aluminum alloy 6063 and AkzoNobel premium powder coating finishes.

Cleaning Methods

A soapy warm water solution can be used to clean the powder coated surface, if necessary.

321 Series – Wicker Components

321 series wicker products are polyethylene (PE) weatherproof synthetic resin mostly 7mm to 10mm diameter. The PE wicker material boasts excellent weather resistance, strong UV resistance for 3000 hours, great tensile strength, freedom from pests and fungus, easy maintenance, and a more diversified appearance. It is made of imported non-toxic and recyclable materials and are certified by major international laboratories such as SGS and UL.

321 Series – Real Teak Components

Teak is one of the world's most sought-after wood. It is one of the best woods to use for furniture, building material, carving, and other outdoor applications. Its density and high oil content make it the premier choice for use in outdoor furniture.

Our teak is Forest Stewardship Council (FSC) Certified. FSC is a non-profit organization that sets standards for forest management and chain of custody operations.

Teak care and maintenance

Teak is renowned for its natural oils, which act as a protective barrier against rot, making it a preferred choice for outdoor furniture. Maintaining teak patio furniture is straightforward, typically involving a gentle cleaning regimen using a mild detergent and water solution along with a bristled brush to preserve its appearance.

Conducting a light cleaning session at the beginning and end of the season is advisable, although regular maintenance is recommended. If left unattended, teak will naturally acquire an attractive silver-gray patina over time.

For more intensive cleaning or to restore the original golden hue, teak cleaner can be employed. Applying teak oil provides added protection against grain cracking and imparts a pleasing sheen to the material.

321 Series – Synthetic Teak (Composite) Components

Our Composite teak is made from high-density polyethylene (HDPE) and is a great alternative to real teak. It provides a similar appearance to real teak.

Composite teak is 100% water resistant & durable, easy to clean, and resistant to cracking and splintering. To clean synthetic teak use a soapy warm water solution & wipe it over with soft sponge/ cloth or use a gentle bristle brush. Another option is to use a hose to spray your furniture and then wipe it dry using a clean cloth. Fine sandpaper can be used to refurbish if necessary.

For tough stains or dirt, use a scrub brush, then rinse off and wipe with a clean cloth. Alternately you can add a capful of bleach to your bucket of water for extra cleaning strength.

321 Series – Sintered Stone Table Tops

Sintered stone is an ideal choice for outdoor dining tables, providing a blend of versatility, beauty, and practicality. Sintered stone is composed of natural materials such as stone dust, minerals, and pigments. The sintering process emulates the creation of natural igneous rocks, where minerals melt and solidify at high temperatures. Sintered Stone is manufactured using recent technological advancements which mimic the processes that form natural stones. Minerals and stone particles like the ones found in porcelain or granite are carefully selected for quality, colour and texture. These particles are then subject to extreme heat and pressure – just like they would be deep in the earth's crust for thousands of years, but achieved much quicker. When the process is finished, the particles are bonded together permanently, without the need for resins or bonding agents, thus creating Sintered Stone.

Sintered Stone and The Environment

Sintered stone has a relatively positive impact on the environment when compared to some other construction and surfacing materials. Here are some key points highlighting the environmental impact of sintered stone:

- **Natural Material Composition:** Sintered stone is made entirely from natural materials, which means it does not contain synthetic components or harmful chemicals. This natural composition reduces the environmental impact associated with the extraction and processing of raw materials.
- **Recyclability:** Sintered stone is fully recyclable. This means that at the end of its life cycle or if it's removed during renovations, it can be recycled or repurposed into new products, reducing waste and landfill burden.
- **Low Resin Content:** Unlike some engineered stone materials like quartz, sintered stone does not contain resins. This eliminates concerns related to the environmental impact of resin production and emissions associated with resin containing products.
- **Reduced Energy Consumption:** The manufacturing process of sintered stone involves sintering, which uses extreme heat and pressure to bond the natural materials together. While this process requires high temperatures, it often results in energy-efficient production because the heat is used to create a strong bond without melting the material.
- **UV Resistance:** Sintered stone's UV resistance allows it to be used in outdoor applications without degradation, potentially extending the life of the material and reducing the need for replacement.
- **Longevity:** Sintered stone is known for its durability and resistance to wear and tear. Its long lifespan reduces the need for frequent replacements, saving resources and energy in the long run.
- **Low Maintenance:** Sintered stone's non-porous nature means it doesn't require sealing or specialized maintenance products, reducing the use of chemicals and water for maintenance.

321 Series – Sling Fabrics by Phifertex

Phifertex sling fabrics are made from either 100% woven vinylcoated polyester or vinyl-coated PVC/Olefin blend. Phifertex material is functional and durable, offers excellent performance while withstanding spills, splatters and the hustle and bustle of high traffic areas. These fabrics are easy to maintain – easily cleaned with soap and water or 50/50 bleach to water solution.

Phifertex is GREENGUARD Certified – this certification ensures products have met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (Vocs) into indoor air. Phifer was the first manufacturer in the outdoor fabric industry to achieve GREENGUARD certification. Certification is completely voluntary and ensures that the highest industry standards are being applied to maintain indoor air quality for the health and safety of building occupants.

321 Series – Sunbelievable Fabrics

Sunbelievable fabrics are made from 100% solution-dyed acrylic material synonymous with beauty, durability, stain resistance, and easy clean-up, ensuring worry-free living. All Sunbelievable fabrics are standard stain and water repellent, fade resistant, and durable. This 100% solution-dyed acrylic fabric is considered the standard for outdoor fabric. High resistance to fading, and long life span. Sunbelievable fabric is a soft, breathable, acrylic that is UV, water, and mildew resistant and does not noticeably shrink or stretch. In addition to being one of the best outdoor fabrics, Sunbelievable acrylic fabric is easy to sew and are commonly used for pillows, cushions, slip covers and upholstery.

Care and maintenance for Sunbelievable - regular vacuuming of your upholstered furniture will enhance the beauty and longevity of your fabric. Treat spills promptly. Gently Blot away the spill with a clean, dry absorbent cloth. Do not rub. Attempt removal of dried contaminants with a soft brush or dull knife prior to using a wet treatment.

FSC Certified (314 Series) and SVLK (40/340 Series) teak

- Teak wood is used for making furniture, boats, and other things which require resistance to the outdoor elements. Because of its density and high content of silica and rubber, it provides strength, beauty, durability and longevity that is unmatched by any other wood on Earth. Left outdoors in the elements, it is not uncommon for a piece of well made teak furniture to last for 75 to 100 years and is often passed down from generation to generation.
- As the outer layer of your teak dries over time, it will begin to patina (lose its color and begin turning grey). Many people feel that this is when the furniture begins to show its true beauty, while others prefer various colorations of newer un-weathered or treated teak.
- The aged patina look of teak is only on the surface, is NOT indicative of disintegration or degradation, and can almost always be reversed with the above-mentioned cleaning and oil treatments.
- Checks and small hairline cracks are a normal occurrence as the wood expands and contracts. This is not a defect but an indicator that it is time to treat your product. Should your product develop some cracks or splinters over time, sand the area very lightly before treatment.

- Soapy water and a soft sponge or non-abrasive cloths can be used to lightly clean product frames from normal dirt, grime, and dust buildup. Do not use chemicals, bleach, or abrasive cleansers in cleaning any parts of your furniture.
- After exposing any wood collection to the elements, it is best to tighten any loose fittings and joints. It is recommended to do so every 3-6 months.

You can maintain the appearance of teak through the occasional multi-step process of cleaning, coloring, and sealing the product. Depending on the amount of sun exposure your teak furniture gets, this could be needed as infrequently as every few years to as often as every few months. Before treating, check for any residue buildup. If this occurs, a light sanding is recommended. Please see the steps on the next page.

We recommend that you treat your furniture in the shade or under cover. Also, treat the product completely on top and underneath. After treating, wipe off excess oil and allow oil to dry in the shade away from direct sunlight, then wipe off with clear rag to remove any excess oil. This process should be repeated every 3-6 months as desired to maintain the look you want.

We recommend the Golden Care products shown here. Always test a small area and follow instruction when applying any product to the surface of teak.

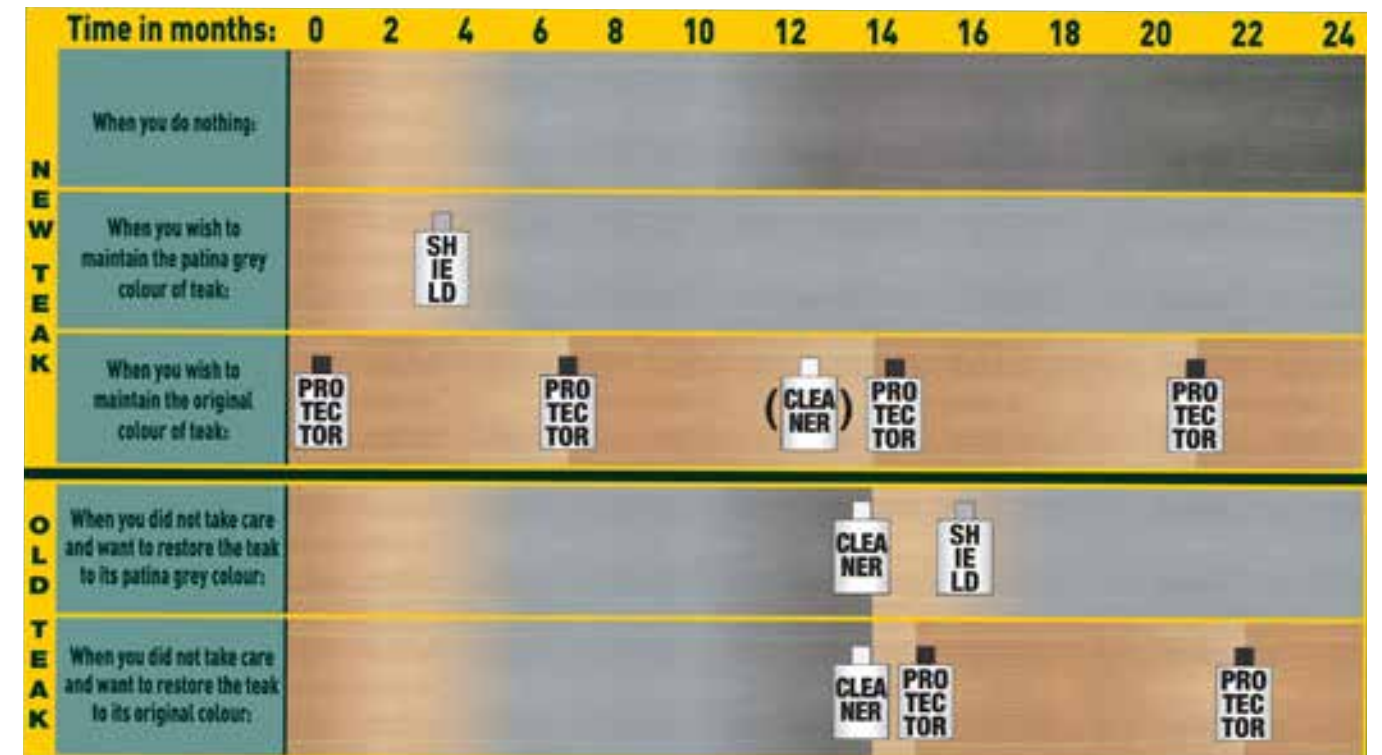

TEAK MAINTENANCE STEPS:

- Clean the product.
- Apply color. Optional.
- Apply the teak shield.

GOLDEN TEAK PRODUCT CARE STEPS:

- Golden Teak Cleaner and Brightener
- Golden Teak Instant **Taupe** w/ Protector
- Golden Teak Instant **Grey** w/ Protector = Coastal Color
- Golden Teak **Honey Brown** w/ Protector = Natural Color
- Golden Teak Shield (Moisture Barrier only, no UV)

Natural aging of Teak over time:

Limited Residential Product Warranties

Alfresco Home furniture is warranted against all manufacturer defects in materials and workmanship for the original owner. Proper care of our products is required to support the benefits of this warranty.

Warranty General Terms

- Frames are warranted against defects in materials and workmanship that impair the use of the product.
- Alfresco Home reserves the right to inspect all items claimed to be defective.
- All warranty claims are made to the original purchaser with proof of purchase.
- Under the terms of these warranties, the manufacturer will repair or replace any item if deemed necessary. If discontinued, it will be replaced with a similar style and finish.
- All warranty claims must be submitted in writing by the retail vendor with complete information including invoice information, date of purchase and photos accompanying the claim.
- Any items used for commercial purposes void these limited warranties.
- Warranties are not transferable.

Warranty Exceptions

- Misuse, fire, freezing, and acts of nature void these warranties.
- General frame rusting on iron frames, including rust and rust drips is not covered.
- Damage to frames, welds, or wicker due to improper assembly and improper use and care (including overwinter care, exposure to water and exposure to sub-freezing temperatures), customer negligence, and/or abuse, are not covered.
- Damage outside of normal wear and tear (chips, scratches, cracking, scuffs, rips) including exposure to the elements, oils, spills, fluids, chemicals or any other causes are not covered.
- Fading or discoloration that naturally occurs with wood products is not covered.
- FSC Eucalyptus and other FSC Hardwood tables and components have a hand applied finish that creates a natural weathered effect. Variation in color and tone as well as slight surface imperfections are deemed as normal and not covered.
- Glass table-top damage, regardless of the timeframe or occurrence, is not warranted.

Cast and Extruded Aluminum Frames

- 22 series: 5 years from the date of purchase on frames, 2 years on finish and wicker, and 1 year on sling. GRC top, LP Burner
- 55, 310 series: 5 years from the date of purchase on frames, 2 years on finish, and 1 year on LP Burner components.

For Cast and Extruded Aluminum frames, the limited warranty covers broken welds, broken arms, and broken legs. Improper assembly, improper use and care, customer negligence and abuse are not covered.

(See above Warranty Exceptions)

Cast/Extruded Aluminum and Everwoven™ All-Weather Wicker

- 22 series: 5 years from the date of purchase on frames, 2 years on finish and wicker, and 1 year on sling.
- 46 Series: 3 years from date of purchase on aluminum frames, 2 years on finish and wicker.

(See above Warranty Exceptions)

Everwoven™ All-Weather Wicker

- 353 Series: 3 years from date of purchase on frames, 2 years on finish and wicker, and 1 year on polywood composite table-tops.
- All Weather Wicker is warranted against peeling, cracking, and fading.

(See above Warranty Exceptions)

Eucalyptus Wood and Everwoven™

- 46 Series: 3 years from date of purchase on aluminum frames, 2 years on finish and wicker and 1 year on FSC Eucalyptus Wood.

(See above Warranty Exceptions)

Extruded Aluminum and Polywood Composite, Textile and Synthetic Rope

- 300 Series: 3 years from date of purchase on frames, finish, polywood composite and synthetic rope, 2 years on textile.

Premium Everwoven All Weather Wicker /Teak/Aluminum Collection

- 40 and 340 Series: 3 years from date of purchase on frames, finish of Biculair Wicker, Aluminum Frames and Cushions.
- Natural aging of Teak and Cushions not warranted.

EverTeak™ Composite

- 316 Series: 5 year limited warranty on our synthetic EverTeak™ products, specifically the EverTeak™ frame. This warranty covers joint failure, warping and bowing tops, material deformation, and frame cracking or breakage, 3 years on PhiferTex slings, and 1 year on cushions.

- Natural aging of EverTeak not warranted.

319 Series Everwoven

- 5 year limited warranty on synthetic EverWoven™ materials, 3 years on aluminum frames, 2 years on any wood components, and 2 years on cushions.

321 Series – LIMITED Product Warranty

Under normal residential use, 321 series products are warranted for a period of 3 years against defects in manufacturing or materials. Excluded from this warranty are: misuse or abuse, extreme weather conditions, acts of God, and any wear or damage that is consistent with usage in contract, industrial or otherwise non-residential settings.

Alfresco Home designs, develops and distributes casual furniture and garden accents for the independent retailer in the Outdoor Living industry.
